

A Decision Support Center (DSC) has been established within the Great Basin Geographical Areas and is located at the Eastern Great Basin Coordination Center. The DSC Coordinator is Dan Mindar and can be reached at Cell 928-245-8771 or 801-531-5378. Below you will find a list of products we can provide. Feel free to contact us with any needs or questions.

Incident or Unit Support

The following list describes potential products or assistance that can be provided by a DSC which may vary according to the local needs of the unit or incident.

Provide assistance with decision making and documentation (WFDSS).

- Review decision content in WFDSS as requested, and provide feedback to reviewer/approver.
- Provide technical assistance with WFDSS such as uploading files, publishing decisions, etc.
- Provide fire behavior and WFDSS training opportunities to within-area and out-of-area resources where feasible.

Provide analysis information to support fire decisions.

- Long term fire spread probability FSPro - 7 days or more of probabilistic fire spread, includes Values at Risk
- Near Term Fire Analysis - 1 to 4 days of projected fire behavior and spread, including Values Inventory
- Short Term Fire Behavior analysis - < 3 days potential fire behavior and spread, including Values Inventory.
- Smoke modeling – for specific incidents or area wide.

Provide Incident Management Team Support

- Provide in depth analysis in support of LTAN/FBAN
- Review decision content in WFDSS as requested, and provide feedback to reviewer/approver.
- Provide technical assistance with WFDSS such as uploading files, publishing decisions, etc.
